

**Venue:** Exhibition, Ground Level

**Presentation:** Thursday 24 July, 12:30-14:30

**The Poster Exhibition is open from Mon 21 - Thu 24 July from 10:00 to 18:30.**

Each poster is displayed for one day. Authors will stand by their posters between 12:30 and 14:30 to answer questions and provide further information on their study results.

**Track A > Basic and Translational Research**

**PE001-002 Viral mechanisms of persistence and latency**

THPE001 **Genetically characterizing the role of cell proliferation in maintaining persistent HIV during effective HIV therapy**

*S. von Stockenström, L. Odevall, E. Sinclair, H. Hatano, P. Bacchetti, M. Somsouk, P.W. Hunt, S.G. Deeks, F.M. Hecht, S. Palmer*  
Australia

THPE002 **The immune checkpoint blockers PD-1, LAG-3 and TIGIT are biomarkers of HIV infected cells during ART and identify distinct cellular reservoirs**

*R. Fromentin, W. Bakeman, M.B. Lawani, G. Khoury, E. Sinclair, F.M. Hecht, S.G. Deeks, S.R. Lewin, J.-P. Routy, R.P. Sekaly, N. Chomont*  
United States

**PE003-007 Host cellular factors and latency**

THPE003 **Drug leads that inhibit Vif and enable APOBEC3G are broadly neutralizing of HIV1 clades and drug-resistant strains**

*H. Smith, R. Bennett, K. Prohaska, J. Slater*  
United States

THPE004 **System mapping of HIV-mediated CCR5 signaling critical for viral infection of blood memory CD4 T cells and macrophages**

*J. Guo, S. He, M. Spear, T. Rasheed, D. Yu, F. Yi, H. Liang, V. Calvert, E.F. Petricion, L. Liotta, H. Shang, Y. Wu*  
United States

THPE005 **Co-culture of antigen presenting cells can induce latency in resting CD4+ T cells**

*N. Kumar, K. Cheong, V.A. Evans, J.L. Zhou, C.D.F. Pereira, J. Anderson, S.R. Lewin, P.U. Cameron*  
Australia

THPE006 **Targeting HIV splicing and translation in latently infected T cells: contributing to a cure**

*G. Khoury, S. Ramarathnam, C. Mackenzie, D. Yurick, C. Sonza, T. Purcell, D. Purcell*  
Australia

THPE007 **Following in vitro culture with myeloid dendritic cells, negative regulators of T cell activation are expressed preferentially on latently infected CD4+ T cells**

*V.A. Evans, R.M. van der Sluis, N.A. Kumar, R.-P. Sekaly, R. Fromentin, N. Chomont, P.U. Cameron, S.R. Lewin*  
Australia

**PE008-009 Tissue reservoirs**

THPE008 **In vivo analysis of HIV persistence and immune responses in the brain**

*J. Honeycutt, H. Vincent, A. Wahl, R.A. Spagnuolo, M. Swanson, K. Gordon, J.V. Garcia*  
United States

THPE009

**Simian immunodeficiency virus (SIV) infection of the macaque testis - an immune privileged site**

*W. Winnall, R. De Rose, C. Fernandez, S. Lloyd, M. Kramski, T. Amarasena, S. Alcantara, J. Girling, M. Hedger, S. Kent*  
Australia

**PE010 Measurement of reservoirs**

THPE010 **Continued decay of HIV DNA species during 3-years of ART is not reflected by decay of HIV RNA in plasma**

*W. Hey-Cunningham, K. McBride, J. Murray, J. Zaunders, S. Emery, D. Cooper, A. Kelleher, K. Koelsch, PINT Study Group*  
Australia

**PE011-020 Targeting and eradication of reservoirs**

THPE011 **Synergistic activation of HIV-1 expression by compounds releasing active positive transcription elongation factor b (P-TEFb) and by inducers of the NF-κB signaling pathway**

*G. Darcis, A. Kula, S. Bouchat, K. Kabeya, N. Delacourt, C. Vanhulle, A. Burny, N. Clumeck, M. Moutschen, S. De Wit, C. Rouzioux, O. Rohr, C. Van Lint*  
Belgium

THPE012 **Transcriptomic and proteomic screening of host genes modulated by HIV-1 in human macrophages: a highly sensitive strategy for the identification of new targets specific of HIV reservoirs**

*A. Deshieri, M. Ouellet, M.J. Tremblay*  
Canada

THPE013 **Immunotherapy depletion of T cells in NHPs infected with SIV: impact on viral load and T cell activation**

*M. Di Mascio, S. Srinivasula, P. DeGrange, A. St. Claire, G. Duralde, L. Chandra, M. Piatak, I. Kim, C.H. Paik, J.F. Tisdale, R.E. Donahue, A. Woolfrey, H.C. Lane*  
United States

THPE014 **Apoptosis activation of HIV replication**

*S. Khan, S. Zeichner*  
United States

THPE015 **Viral specificity of small molecule latency disruptors**

*K. Keck, S. Fernandez, A. Phan, J. Miranda*  
United States

THPE016 **A dual-reporter cell line, expressing basal levels of Tat from its native IRES, reveals the poor specificity of current epigenetic modifying drugs for proviral HIV-1 activation**

*J. Jacobson, K. Jarman, L. Harty, K. Lowes, K. Lackovic, D. Purcell*  
Australia

THPE017 **Modeling the effects of vorinostat in vivo on activation of latent HIV-infection**

*S. Lewin, K. Ruian, J. Elliott, A. Perelson*  
Australia

THPE018 **Development of T-pharmacocytes for the targeted eradication of HIV reservoirs**

*R.B. Jones, R. O'Connor, S. Mueller, V. Vrbancac, S. Kumari, A. Tager, H. Wong, E. Jeng, E. Benko, C. Kovacs, B. Walker, D. Irvine*  
United States

THPE019 **A new family of compounds that reactivate latent HIV in central memory T cells**

*A. Bosque, C. Novis, L. Martins, A.B. Silva, P. Luciw, N. Archin, D. Margolis, V. Planelles*  
United States

THPE020	<p><b>Quantification of drug transporters in vaginal and cervical tissue using a novel targeted proteomics approach: implications for small molecule disposition in viral reservoirs</b></p> <p><i>C.G. Thompson, J.K. Fallon, M. Nicol, P.C. Smith, A.D.M. Kashuba</i> United States</p>	THPE028	<p><b>National NeuroAIDS Tissue Consortium: enabling studies on HAND neuropathogenesis</b></p> <p><i>I. Grant, S. Sherman, S. Morgello, E. Singer, H. Fox, B. Gelman, D. Brandt</i> United States</p>
<b>PE021-023</b>	<b>Preclinical drug development</b>	THPE029	<p><b>Prospective multicentric evaluation of a screening questionnaire as an entry tool for neuropsychological short testing in HIV/AIDS-patients</b></p> <p><i>G. Arendt, E. Orhan, P. Arbter, N. Brockmeyer, G. Faetkenheuer, B. Gospodinov, K. Hahn, I. Husstedt, K. Isernhagen, B. Jensen, W. Koethemann, H. Knechten, S. Mauss, S. Mauruschat, V. Miasnikov, A. Neuwirth, M. Obermann, J. Rockstroh, M. Reith, K. Römer, G. Schmutz, S. Scholten, T. Seidel, A. Strehlow, A. Theisen, C. Wyen</i> Germany</p>
THPE021	<p><b>Development of a novel formulation of tenofovir disoproxil fumarate (TDF) to increase bioavailability and reduce dose for treatment of HIV/AIDS in emerging markets</b></p> <p><i>M.
